

It has recently come to my attention that there is a possibility that LPFM could be given broadcasting priority over FM translators. If this happens a station I value very much could be affected. This station is 92.1 K-LOVE. This station is important to me personally because it helps in my devotion and expression of love to my God. I have also noticed on many occasions where the effects of the music have calmed my nerves and made me a safer and relaxed driver. K-LOVE provides the community with service awareness issues, such as local area events in which the community can help others, daily advice promoting peace, love, and self-sacrifice towards family and community. If K-LOVE were to be removed from the air in multiple communities all these benefits that promote a peaceful and self-sacrificing mindset would be lost. It is commonly understood that attitudes effect all areas of life, and any medium that promotes qualities of love and peace should be promoted, especially in today's society where violence, distrust, and selfishness are so commonly promoted. So to remove K-LOVE would be depriving the community of a valuable light. In closing I would like to thank the FCC for taking the time to read and consider my comments.
